PAR-KER® Parquet cerámico

El parquet cerámico constituye en la actualidad una opción muy valorada a la hora de escoger un pavimento. PORCELANOSA Grupo ofrece en su catálogo un amplio abanico de modelos en distintos acabados y formatos.

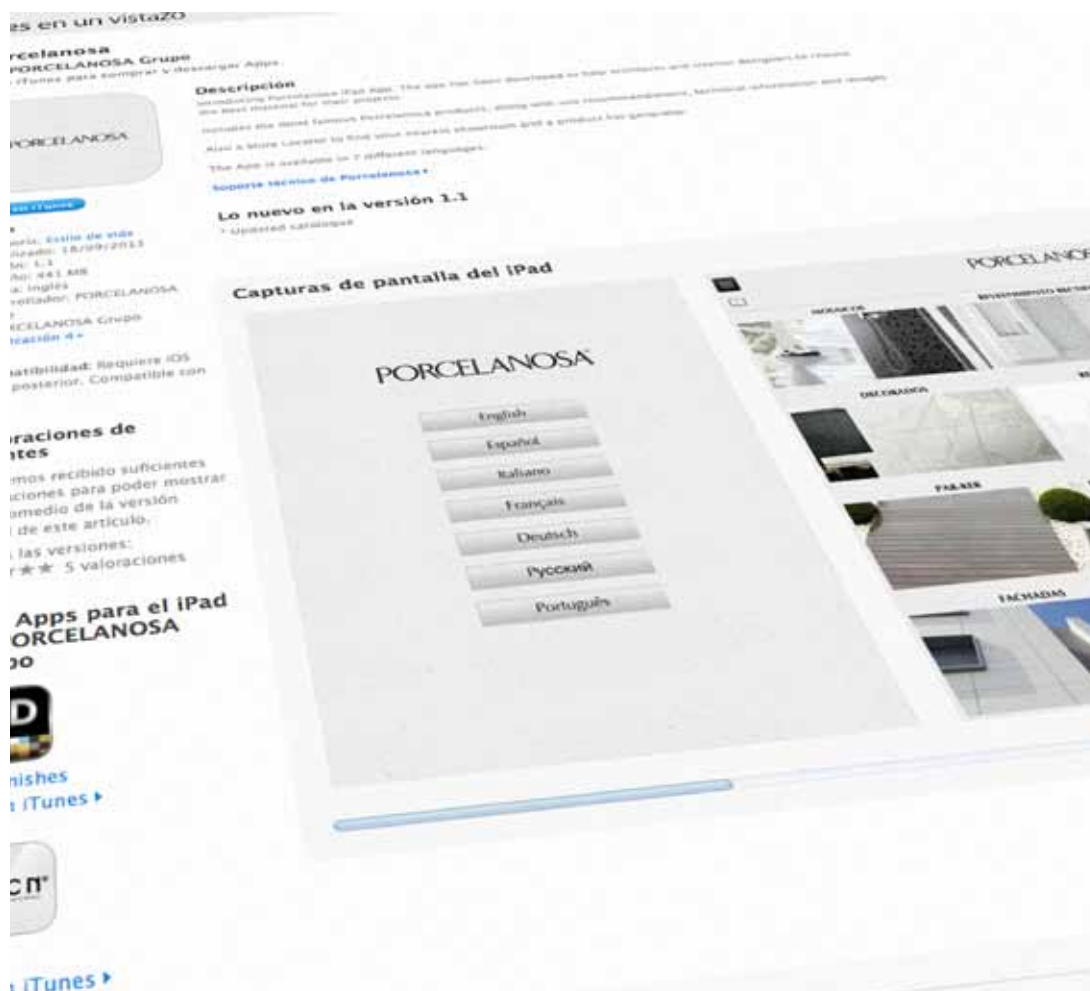

Por las características que le confiere su naturaleza, esencialmente cerámica, el parquet cerámico de Porcelanosa ofrece toda una serie de ventajas frente al tradicional parquet de madera, sin perder el aspecto cálido y acogedor de

PORCELANOSA CUSTOMER SERVICE

In the event of an enquiry, call our customer helpline on +0034 901 100 201 (for UK calls please dial 08702 240245).

If you prefer, you can also contact us by e-mail at: atencion.cliente@porcelanosa.com

MOBILE PHONE APPS

PORCELANOSA Group offers a series of mobile phone apps, aimed at professionals from the fields of architecture and design and users interested in products and materials by the group.

You can download them directly from the Apps. section of our website or else from iTunes.

DECORATIVE PROFILES

Butech's decorative profiles are the small details that make a difference in bathroom design.

Butech offers a wide range of profiles that are adapted to a wide variety of uses: decorative metallic lines, separations between different materials, corner protections, or upper trims for wall coverings. Thus, Butech offers its customers solutions for all types of bathrooms and kitchens, from functional design chromed profiles to 24 k gold profiles for the most exclusive environments.

The Crystal line is Butech's latest development in decorative profiles. This new decorative line combines the unparalleled shine of Swarovski crystals with the stylishness of chromed profiles. It has been designed for complementing PORCELANOSA Group's most distinguished and exclusive wall coverings.

ECOLITE / 185x95 cm

ECOLITE is a new series of acrylic bathtubs designed to meet the challenges of today's market: sustainability, visual appeal, and a competitive edge. ECOLITE bathtubs are a smart, responsible solution able to fit in with the budget requirements of consumers and projects of all kinds, thanks to their unbeatable price/quality ratio. Similarly, the series meets today's indispensable need for sustainable water consumption, without relinquishing SYSTEMPOOL's high design standards. With their combination of gentle curves and straight lines, ECOLITE bathtubs have a strong visual appeal, fitting in beautifully whatever the setting. Available in 8 formats.

YOVE

YOVE is a new collection of bath and shower enclosures that stands out for its up-to-date, minimalist design, without relinquishing robust strength.

The collection comes in a choice of different formats and sizes to meet varying requirements, with two heights: 1.950 mm enclosures for shower trays and 1.450 mm ones for baths.

All the enclosures feature sliding doors, occupying less space in the bathroom while ensuring greater comfort for users.

The doors have two ball bearings at the top, leaving the bottom of the enclosure free. Thanks to the slimline profiles and dismantable bottom guide rail, this is a highly functional, versatile series. The whole series is made of transparent 6mm tempered glass, factory treated with System-Glass™.

Profiles high brilliance finish.

PORCELANOSA CERAMIC SHOWER TRAYS

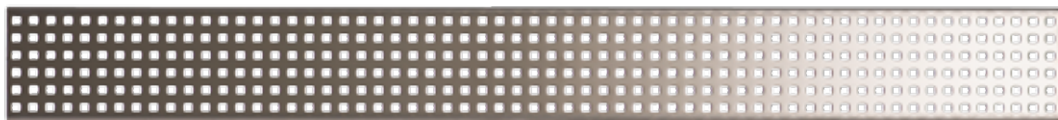

The presence of water always involves a leak risk that must be taken into account when designing and building any type of bathroom setting. Humidity, leaks, or water seepage can be avoided by applying a waterproof layer under the ceramic tile covering, which will prevent water from seeping through.

Butech offers a wide range of waterproof products compatible with the installation of ceramics, among which we can highlight the compact systems that include drain and heat-sealed waterproof sheet. It is specially recommended for ceramic showers.

It is available in two heights, and includes a wide range of stainless steel decorative gratings.

TILED FAÇADES

All STON-KER, URBATEK and even PAR-KER tile models can be used on façades. Thanks to their technical characteristics and wide variety of designs, they are ideal as outdoor cladding on buildings.

Through its Technical Project Department, Butech offers clients of PORCELANOSA Grupo assistance in the design and assembly of façades.

Salient products:
VENTILATED FAÇADES
BONDED FAÇADES

TECHNICAL SOLUTIONS

Ventilated façade systems, raised access floors, waterproofing and sound solutions, and renewable energy systems help to optimize installation processes, as well as improving energy efficiency and the home's performance.

FULL SAFETY AND ASSURANCE

TILE-LAYING MATERIALS

A specific adhesive is required for each tile model. PORCELANOSA Grupo has a close awareness of its products' requirements, and it develops technical solutions to facilitate the installation of different tile models and to ensure safe, healthy buildings.

PORCELANOSA Grupo only recommends tile-laying materials by Butech. Ask your showroom's tile salesman for guidance in choosing the right tile adhesive.

Salient products:

flexitec n
one-flex n
levelling tile spacers and wedges

PERFECT FINISHES

GROUTING MATERIALS

The colour, shade and texture of tile joints are important aspects to be taken into account in the design of tiled surfaces. Just as you select the tile model of your choice, you should also choose the grout that best fits in with it.

The quality of the grouting material is also crucial so as to prevent changes in colour, loose grouting or even water penetrating the joints. PORCELANOSA Grupo's tile catalogues specify the recommended shade of grouting material to use with each tile model.

Salient products:

colorstuk rapid n
epotech gold

WATERPROOFING SYSTEMS

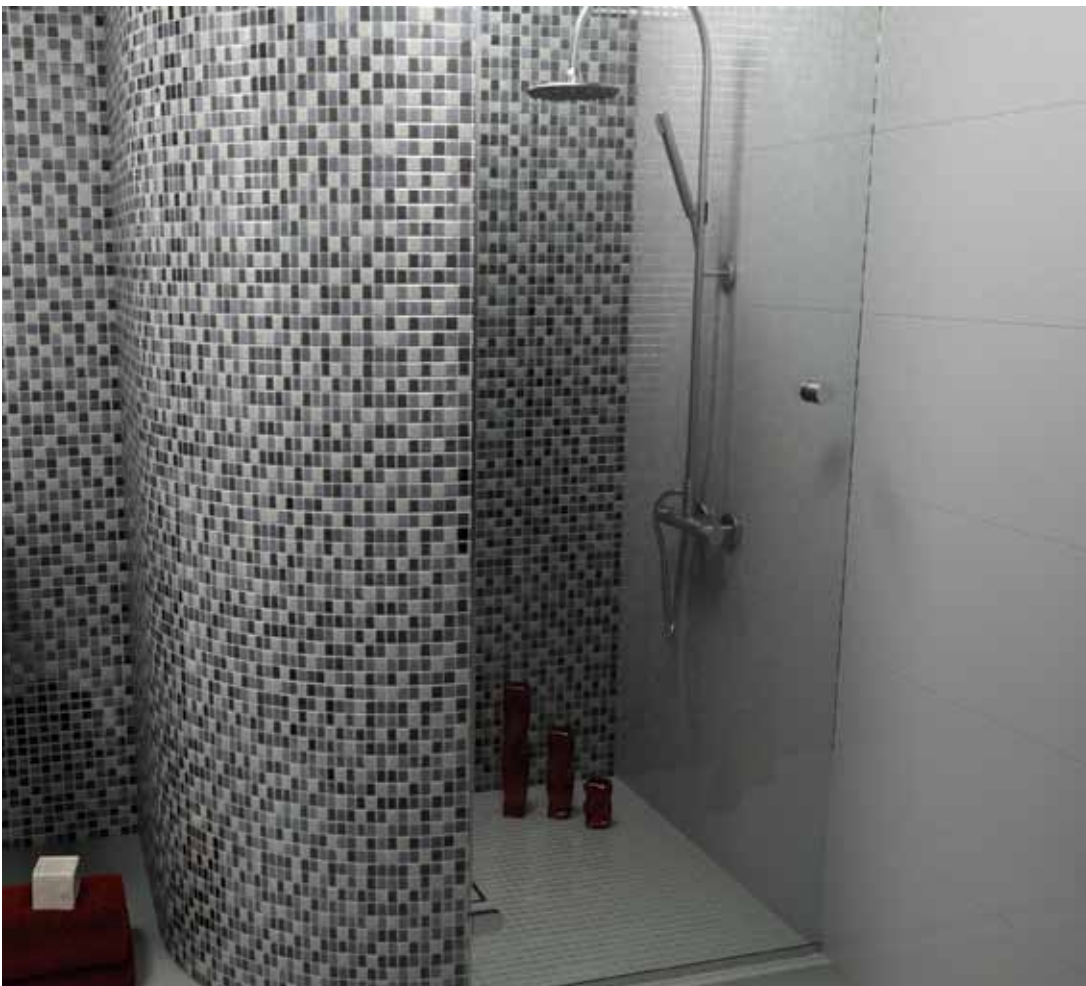

When water is present, there is always a risk of leaks. This contingency must be taken into account in the design and creation of all bathrooms. Damp, drips and water leaks can be avoided by laying a waterproofing membrane under tile coverings as a moisture barrier.

Waterproofing membranes, waterproof mortar, drains and decorative drain grills are essential in the creation of all swimming pools, terraces and bathrooms.

Salient products:

STANDARD IMPERBAND KIT
100 mm high
Horizontal and vertical outlets

IMPERBAND REFURBISHMENT KIT
75 mm high
Horizontal outlet

TILED SHOWERS

A growing number of bathrooms feature showers with a tiled or mosaic tray instead of a conventional fiberglass one. Butech offers a wide range of waterproofed prefabricated panels ready for tiling over with mosaics or tiles, with the right slope for water to drain away.

This kind of tray is specially recommended for bathroom refurbishment projects.

For further information about this kind of shower tray and stainless steel drain grills, ask the sales team at your nearest PORCELANOSA showroom.

Salient products:

1.000x100x40 mm Concept XPS shower tray with central drain grill
1.200x90x30 mm Concept XPS shower tray with lateral drain grill

RAISED ACCESS FLOORING

Floor tiles by PORCELANOSA Grupo can also be used in office buildings where raised access flooring with a metal structure is needed. All 59.6x59.6 STON-KER models can be adapted by Butech for use in this system.

Butech also manufactures special double-thickness porcelain tiles for use on terraces, using PVC pedestals assembled on the waterproofing layer.

For further details of this system, ask the sales team at your nearest PORCELANOSA showroom.

CLI-KER n.

One characteristic of architecture today is the need for building systems that can save on costs and project execution times. In response to this demand, Butech has developed CLI-KER n: an adhesive-free dry-installation flooring system.

Available for use on indoor floors and terraces.

For further information about this system, see www.butech.es

Salient products:

CLI-KER ext

UNDER-FLOOR HEATING

Under-floor heating is the most efficient, cosy heating system. Nothing could be nicer than to get up in the morning and walk across flooring with radiant-floor heating.

This heating system is specially designed for bathroom refurbishment projects and it can be used with surfaces of all kinds.

For further information about this system, see www.butech.es

Salient products:

Electrical radiant floor heating:

3 m² (150W/m²)

Available on a 1 to 10 m mesh

GEO THERMAL ENERGY

Geothermal energy is a renewable source of energy that can be used to heat homes. Geothermally heated buildings offer big advantages over those heated with other renewable energy sources. These include the absence of any impact on the building's design, guaranteed regular supplies, and a rapid payback.

Through its Geothermal Analysis Department, Butech offers clients of PORCELANOSA Grupo its expertise and experience in heating homes.

For further information about this system, see www.butech.es
